

Amendments to the Claims

The following listing of claims replaces all prior versions of listings.

Listing of Claims:

1. (Currently Amended) A drug delivery liposome composition for delivering a substance to be administered to a target site, which comprises an oligosaccharide coated liposome and a substance to be administered, wherein the substance to be administered is an anti-cancer drug, which is administered intraperitoneally, taken up by macrophage in the peritoneal cavity and delivered to at least one of the greater omentum and the extranodal small lymphatic tissue in the mesentery.

2. (Original) The drug delivery liposome composition of claim 1 wherein the oligosaccharide is oligomannose.

3. (Previously Presented) The drug delivery liposome composition of claim 1 wherein the oligosaccharide is mannopentaose or mannotriose.

4.-7. (Canceled)

8. (Previously Presented) The drug delivery liposome composition of claim 1 which is administered in combination with oligosaccharide coated liposome encapsulating a magnetic compound.

9. (New) A method for administration of an anti-cancer drug which comprises administering intraperitoneally a drug delivery liposome composition for delivering an anti-cancer drug to a target site, wherein the anti-cancer drug comprises an oligosaccharide coated liposome and an anti-cancer compound, so that the drug delivery liposome is taken up by macrophages in the peritoneal cavity and is delivered to at least one of the greater omentum and the extranodal small lymphatic tissue in the mesentery.
